PROFESSIONAL SUMMARY

Full Stack Developer and recent graduate from Northwestern's Coding Boot Camp with an extensive background in generating custom educational content for customers in the software industry. Able to see a product from multiple angles and collaborate with both a wide variety of team members and clients. Proven success creating interactive experiences for a variety of Fortune 500 companies as well as local and state governments.

TECHNICAL SKILLS

Languages: Javascript

Technologies: Git, Node.js, React.js, MySQL, MongoDB, Mongoose ODM, HTML, Cascading Style Sheets, Bootstrap, Express.js

PROJECTS

Chicago School Search

GitHub: github.com/Chicago-School-Information/school-info

Live Website: chicago-school-info.herokuapp.com/

- A website built to help Chicago citizens find data about their local public schools and provide them with contact information for their local aldermans.
- Built the Google Map functionality on the page.
- **Tech used includes**: HTML5, CSS3, Bootstrap, Google Maps and Google Geocoding APIs, Node.js, Sequelize, Node Express, MySQL

Chicago Commute Checker

GitHub: bit.ly/2rUg5id

Live Website: bit.ly/33QvrC0

- This is a web app that allows users to choose a CTA train line and enter their ZIP code for up-to-date weather and train alerts. The app also recommends whether the user should commute or work from home.
- Contributed mainly to the javascript logic.
- **Tech used includes**: HTML5, CSS3, Materialize, Moment.js, jQuery, Ajax

Clicky Game

GitHub: https://github.com/woaky1/clicky_game

Live Website: https://woaky1.github.io/clicky_game/

- A memory game created using React.
- **Tech used includes**: React, Bootstrap, Node.js
